

Cleaning / Storage

Always remove bladder, close all zips and Velcros before washing gently with regular detergent.

FBH (Full Body Harness) can be washed with garment. Cover metal buckles to avoid damage.

To remove stains, oil, grease, soak over night in lukewarm water with dishwashing detergent (1 cup) before washing.

Washing with other programs or higher temperatures will cause accelerated ageing of the taped seams, coating and reduce water repellent properties.

Protection against water penetration will be lost!

Can be impregnated with commonly available agents. Hang up to air dry.

Store dry.

Shell: Polyester/PU Lining: Nylon
